■ Instructions for use:

Find the analysis reports here.

The screenshot shows a web interface for an 'Analysis Report'. At the top, there is a small image of a heart. Below it, the title 'Analysis Report' is centered. A list of four bullet points provides probability percentages for different cardiac conditions. Below the list, an 'Inference' statement is displayed. At the bottom of the report area, there are two buttons: 'Save' and 'Upload Report'. A text prompt asks the user to click on a button to upload the report. Three callout boxes provide instructions: one points to the report content, another points to the 'Save' button, and a third points to the 'Upload Report' button.

Analysis Report

- Probability of the input image to have Hyperdynamic Circulation: 67.55%
- Probability of the input image to have Normal Ejection Fraction: 8.40%
- Probability of the input image to have Moderate Ejection Fraction: 12.84%
- Probability of the input image to have Severe Ejection Fraction: 3.30%

Inference: The image has high evidence of Hyperdynamic circular.
